INTRODUCING
THE NEW 190 COLLECTION
New 190, New Benchmark

The new 190 maintains all the history and heritage of this core Manfrotto family, but sets a new industry benchmark with a host of elegantly simple innovations and practical improvements.
SOLID AND FAST TO SET UP

QUICK POWER LOCK
The new Quick Power Lock levers provide extreme locking grip and can be released with one hand and a single movement.
The same, great original feature that has meant the success of this product has now a new design but keeps its core possibility of discovering new perspectives.
The new vertical-horizontal column mechanism is hidden inside the tripod’s top casting until it’s needed. This allowed to save the space previously occupied by the shells.
LIMITLESS CREATIVITY
EASY LINK

Taking its lead from our professional equipment lines, the new 190 also includes an Easy Link attachment in the top casting, allowing the tripod to expand the shooting holding a LED light, reflector or other accessory, and turning the 190 into a mobile studio.
SMOOTH OPERATIONS

ROTATING BUBBLE
The bubble level can be rotated 360° so it never falls inconveniently under a head locking lever and can always be positioned where it’s more convenient for the user.

NEW LEG ANGLE SELECTORS
New leg angle selectors are more intuitive and more ergonomic, again cutting set-up time while also making the new 190 safer to use.
The 190 is the first example of a new house style that's distinct, yet still distinctly Manfrotto, with bold, clean shapes and lines dictated by function. The Manfrotto logo and “Made in Italy” feature prominently, and help the new 190 to stand out from the crowd everywhere from point of sale to photo location.

ALUMINIUM 3 SECTIONS TRIPOD
MK190XPRO3-BH
ALUMINIUM 3 SECTIONS KIT WITH BALL HEAD

The model with three section aluminum legs is the right choice for providing high stability even when using long lenses. Moreover, the limited number of sections cut down the set up time.

It's also available in kit with a ball head (with quick release camera plate) allowing to position the camera freely and quickly, then block it solidly in place using the convenient single locking knob, ready to shoot in an instant.

ALUMINIUM 4 SECTIONS KIT WITH BALL HEAD

Thanks to the additional 4 section, legs can be collapsed to a more compact dimension, enhancing transportability. It's the right choice for all those photographers wanting a strong and reliable support even when travelling.

It's also available in kit with a ball head (with quick release camera plate) allowing to position the camera freely and quickly, then block it solidly in place using the convenient single locking knob, ready to shoot in an instant.

**190 COLLECTION - CARBON FIBER 3 SECTION**

**MT190CXPRO3**  CARBON FIBER 3 SECTION TRIPOD

Three sections Carbon fiber legs to provide the highest level of camera stability and lightweight. The 100% Carbon Fiber tubes increase the legs rigidity and absorb vibration stabilizing the equipment in any condition, while dramatically reducing the weight versus aluminium tubes.

**MT190CXPRO3**

- 160cm • 63in
- 135cm • 53.2in
- 91cm • 36in
- 61cm • 24in
- 1.6kg • 3.6lb
- 7kg • 15.4lb

**190 COLLECTION - CARBON FIBER 4 SECTION**

**MT190CXPRO4**  CARBON FIBER 4 SECTION TRIPOD

The perfect choice for all those photographers who don’t want to accept any compromise both in stability and in portability. The four section legs allow an impressive compact dimension while the 100% Carbon Fiber tubes increase the legs rigidity and absorb vibration stabilizing the equipment in any condition.
